

MEASURING DATA MANAGEMENT SOFTWARE CODE 7316-10

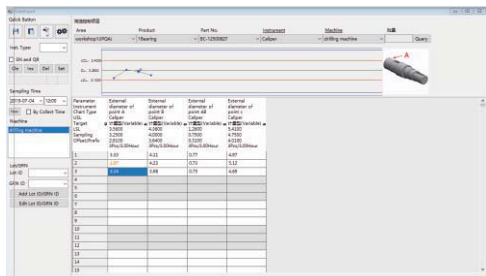

Direct Transmission

- Transmit data through cables or wireless systems

Data Management

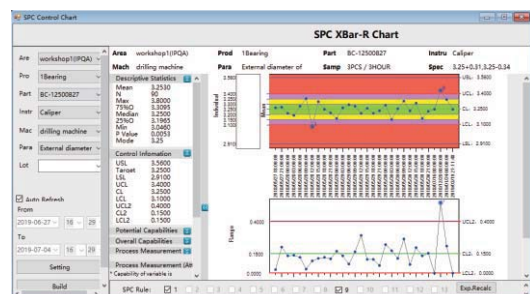

- Measuring data are stored in database

Quality Control Chart

- Analyze the tendency of data, make production adjustment in advance

Quality Report

- Generate different EXCEL report formats according to requirements

The screenshot shows a detailed quality report table. The table has columns for 'Product Name', 'Part No.', 'Instrument', 'Unit', and 'Lot ID'. The data is organized into rows, with some rows highlighted in blue. The report includes various control elements like buttons and dropdown menus. The table is titled '产品质量数据表 Product Parameter Data Report'.
